

PETITION TO THE CITIZENS' ADVISORY COMMITTEE for an INDEPENDENT LIVING SEMI-POSTAL STAMP

Congress has long recognized that millions of individuals with disabilities reside in the United States. The Centers for Independent Living, of which there are almost 500 located in all 50 states and US territories, have helped millions of persons with disabilities live independently. To celebrate this fact and to raise public awareness about the importance of Independent Living to individuals, we respectfully request that consideration be given to the first ever Independent Living semi-postal stamp. Many individuals have been forced into institutionalization over the years and it is hoped that by raising public awareness more of our brothers and sisters will live in the community of their choosing and have the ability to not only dream their futures but to live them.

Please sign this petition urging the Citizens' Stamp Advisory Committee to approve the issuance of the first ever semi-postal stamp promoting Independent Living. Please print Name and Address legibly and sign in ink.
